# Lost & Alone

One of the better English language publications to spring up in Tokyo in recent years. While there's plenty of detailed information on places to go, food, wine, and art, this is no breathless glossy advertising supplement. A recent issue covered riding ferries with fisherman, and how to use the betting forms at Japanese racetracks. Part of the magazine's charm and utility lies in pointing out unusual diversions that are reasonable affordable — no small thing in Japan. —Edith Updike
